Engine & Performance

We evaluated engine health and completed the necessary replacements and servicing to make sure the bike feels smooth and responsive every time you ride

Parameters	Status	What this means
Spark Plug	✔ Good	Ignition component functions properly; ensures reliable engine starting
Carburettor	✔ Good	Fuel mixing unit functions properly; ensures optimal engine performance
Cylinder Block	✔ Good	Cylinder block intact; maintains main structural engine integrity and sealing
Silencer	✔ Good	Exhaust system functions properly; reduces noise effectively
2nd Key	✔ Good	Spare key available; provides backup access if needed
Fuel Tank Cap	✔ Good	Fuel seal functions properly; prevents evaporation and contamination
Engine Oil	✔ Good	Lubrication fluid at proper level; ensures smooth engine operation
Oil Filter	✔ Good	Filtration element functions properly; maintains oil cleanliness
Throttle Body	✔ Good	Electronic throttle unit functions properly; ensures precise control
Clutch Plate Kit	✔ Good	Clutch plates are in good condition; provide proper engagement and control
Engine Head Kit	✔ Good	Head kit intact; preserves valve train components and operation

EXPERT OPINION
....

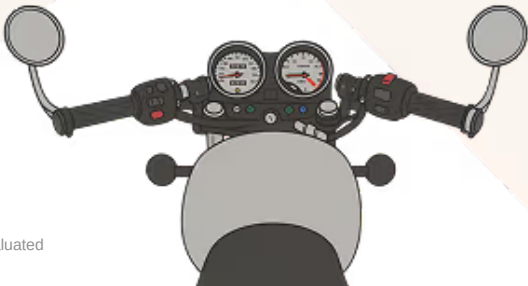

Electrical & Instrumentation

From the ignition to the instrument cluster, we verified all essential electrical systems to ensure reliable operation during daily use

Components	Status	Verdict
Battery	✔ Good	Power storage unit functions properly; provides reliable electrical energy
Starter Motor	✔ Good	Engine starting unit functions properly; provides reliable cranking power
Ignition Switch	✔ Good	Starting control functions properly; operates engine ignition system
ECU	✔ Good	Engine control unit functions properly; manages all engine systems
ABS Module	✔ Good	Anti-lock braking control functions properly; ensures safety system
Indicators	✔ Good	Turn signals function properly; ensures clear direction indication
Horn	✔ Good	Horns are functional; produces clear and audible sound
Instrument Cluster	✔ Good	Instrument cluster is operational and displays all vehicle information clearly
Lighting System	✔ Good	Front lighting system is operational and provides proper illumination

EXPERT OPINION

....

Suspension & Handling

We assessed and tuned the suspension and handling components so the bike feels stable and comfortable as you ride

Parameters	Status	What this means
Swing Arm	Good	Swing arm intact; supports stable rear wheel movement
Front Suspension System	Good	Front suspension functional; provides smooth damping and support
Rear Suspension System	Good	Rear suspension functional; ensures smooth riding

Customers Love Us

“ Before buying a used bike, I was nervous about the purchase. The DriveX inspection report gave me all the information I needed, helping me feel confident in my choice.

Rohit
Software Engineer

“ As a teacher needing a dependable scooter, the detailed inspection report was a lifesaver. It highlighted even minor issues I would've missed, giving me total peace of mind.

Anita
Teacher

“ I run a small business and needed a second bike for errands. The inspection was honest about what was good and what needed fixing, which helped me bargain fairly and buy with confidence.

Manoj
